HEALTH WORKERS FIGHT AGAINST WOMEN & CHILDREN ABUSE AT GEDLEZA WARD FIVE

HEALTH WORKERS AND THE COMMUNITY TEENAGERS DURING THE EVENT

It was a day worth looking forward to when health workers in conjunction with various stakeholders took part in fighting against women and children's abuse activities held in one of the local communities under Gedleza area. On the 21st of July Gedleza clinic staff hosted a campaign based on women and children's rights. It is imperative to educate & empower women and young girls and in the community especially regarding life orientation and gynaecological topics that they may be well informed about.

Emphasis was made to young girls of this community regarding the importance of focusing on their health and education this will brighten their future instead of peer pressure activities that might destroy their goals in life, not to mention how important women are in this life we are living, which makes it a necessity to look at how they carry themselves in their days of existence. Women's rights were emphasized by the Social worker (Mrs Snethemba Nyawo).
