Their stage play was so entertaining and humorous. The stage play showed exactly how was it like to work with Dr. Kilufya. Basically there was no need for speeches, because the play showed us everything from OPD to admission of the patient emergency, calling of Dr Kilufya, Dr. Kilufya's response when he was called, sending of the patient to Theatre and during Operation.

During the speeches, people talked about how great the man he was. In his speech he talked about the relationships he made during his stay working at Ceza Hospital. "The working conditions I encountered made me a better person.

Leaders with well-fitted talents

Our Hospital Manager, Mrs M.T. Zulu has many times proved to be among leaders with well-fitted talents. On the fifth of May 2005 Mrs Zulu conducted a spectacular and fascinating Batho Pele Implementation Workshop. Her outstanding teaching talent gives life to all institutional workshops.

When she was conducting the workshop, she kept us glued to all that was lectured to us through her talent. I don't think that with such eye-opening workshop our institution that is Ceza Hospital will have any difficulties in implementing the Batho Pele programme.

According to me the appreciation I am expressing is due and will be the short in the arm to our dedicated Hospital Manager.
