## ACCOLADES

#### Dear Mr Sangweni

I just want to praise Eshowe Hospital for their efforts in not only scaling up Phila Mntwana, but also sustaining it. You are the <u>only facility</u> in the district that have consistently reported good numbers over the last 3 years, and the fact that Eshowe Hospital have not had any SAM deaths in 18+ months could probably be attributed to the efforts at PHC also.

A heartfelt thank you to your team and well done!

#### Please keep up the excellent work!

**Compliment for Ward 10** 

My name is Skhumbuzo Ramafuna **File number ( 5502/16)** and was submitted at Eshowe district hospital on the 1<sup>st</sup> August 2016 -4<sup>th</sup> August 2016 .Guys we all heard of how bad the government hospitals can be and harassing the nurses can get. I have been in and out of public hospitals more than ones and as the name says PUBLIC the feeling in there is overwhelming , you feel at home. When I got to your hospital as sick as I was in the background of my mind was the things people have been talking about plus counting that **my own mother passed away at Eshowe hospital.** My life couldn't get worse , but I was so disappointed from day one when only to find that your nurses are very professional , clean , well-spoken , listens to the patients checks up on them to from time to time. You really made me feel at home and surely not only me. All of that deleted the things I have been hearing about government hospitals as honestly there wasn't much of a different between the private hospital and you guys. I am writing this because it is only fair that good things must also be said about you guys not only the neg-

# ative and I am saying Please keep up the good work.
