Nursery Project

King Edward VIII Hospital Nursery Project is almost at the completion phase. The project includes new Nursery Building, revamped of Maternity Ward 01, Psychology and Physiotherapy Building. It gives us pleasure to report that Physiotherapy was completed and building was handed over. Physiotherapy services have since moved back to the newly refurbished building. Psychology building has also been handed over to the users. The estimated completion time for Nursery and Maternity Ward 01 is August 2020.

Hospital Management would like to place on record appreciation to all staff members and departments concerned for being patient through the entire duration of the project. Team work shown during this time is commendable.
