The note from the Management

We are at the beginning of a new year, 2016. Mseleni staff finished the old year well when Nov 13th we saw the National Public service acknowledge the hard work and commitment that Mseleni has to the patients and community by awarding the Best Batho Pele Team of the Year 2015 GOLD!

Some have now left us with the proud addition to their CV's, others have joined us, but the purpose of our work has not changed. Our mission – **We are committed to deliver holistic, high quality, comprehensive health care to our community through preventive, promotive, curative and rehabilitative level of primary Health Care – promoting personal development and health of both workers and community members.**

As we set about our mission there will be challenges along the way, difficulties to face and obstacles to overcome. There will be disappointments and setbacks. But we must prepare ourselves for the struggle. We have a reputation to maintain and a mission to complete! Inspections for ideal clinic and national core standards will be part of our year. We will be preparing for increased Nursing and medical students, for regional psychiatric services and renal services, for more school health and ward based family teams, for healthy lifestyle promotion to name but a few programmes.

Look around you and see what needs to improve. We have not yet become what we can be. Then look at yourself and see that you too need to improve because you have not yet reached your full potential that God has given you!

May God grant this year be one of growth for us all.

Thank you .
