WELCOME TO OUR

ANNUAL ORIENTATION

BY IHETDC.

it is a new year, Niemeyer Memorial Hospital has new recruits.

IHETDC is posed with the responsibility to induct and to integrate new hires into the hospital and orientate them on systems, procedures, culture, values and the facility itself. This Induction and Orientation also helps them ease into the new environment.

Various section heads are invited to the orientation to present the operations of their section and how it fits into the entire health system. Thus making it easier for them successfully carry out their duties.

GLAUCOMA WEEK

'UNITING FOR A GLAUCOMA-FREE WORLD'.

World Glaucoma Week is commemorated to raise awareness of this silent robber of vision.

Glaucoma is a group of eye diseases that cause progressive damage of the optic nerve at the point where it leaves the eye to carry visual information to the brain.

If left untreated, most types of glaucoma progress (without warning nor obvious symptoms to the patient) towards gradually worsening visual damage and may lead to blindness. Once incurred, visual damage is mostly irreversible, and this has led to glaucoma being described as the **"silent blinding disease"** or the **"sneak thief of sight"**.

This year the eye clinic commemorated Glaucoma Week by encouraging all Patients and staff members to screen for Glaucoma.

The focus was directed mostly to staff members especially because we often get so busy and we omit to take care of our basic health.
