I am Smangele Zondi working at Mabedlane clinic under Nkonjени District Hospital as a Clinical Nurse Practitioner. I was trained as NIMART nurse by FDP, From training I had an insight, since protocols and guidelines were given.

One day I had one incidence that lowered my self esteem, the client was having co-infection of TB and HIV. He was started on TB treatment then after two weeks he came for ART initiation,. He had a very low CD4 count, one week passed by the I phoned the Community Care Giver to go and check him. The report I got was not good and three days later he passed away.

I felt so bad asking myself what have I done I phoned my mentor telling her I can not continue with this thing, she came for support and check the file say " you have done all you were supposed to do, anyway you were saving life, unfortunately he did not make it". With mentoring and clinical audit, I become more confident and competed, thus I became a mini expert on NIMART.

**" so far life
 expotency of our
 community
 Is gradually
 Improving"**

With us initiating there was increasing number of client causing more congestion resulting in long waiting times, then we implemented Mpilonde Clubs. (it a chronic club that integrates all chronic). But Mpilonde Clubs wouldn't be successful without 3 TIER which has help us to identify early missed and late missed the appointment before the client came to default.

Stable clients who were virally suppressed were moved to Mpilonde Clubs and there are given two month supply, we will be upgrading to three month supply that will make the client to come four time a year in the clinic.

Being NIMART trained

- I am able to manage Paeds and adult at the PhC Level.
- Integrated TB and HIV co-infection.
- Fast patient enrollment on ARIT (no waiting times of eligible clients)
- Greater acceptability and accessibility.
- Improved patient outcome, we started on a CD4 count of 200 we upgrade to 350, we are now at 500 and with the PMTCT we initiate at diagnosis, the soon we start the better are the outcomes

PHELOPHEPHA HEALTH TRAIN ARRIVED AT ULUNDI MUNICIPALITY

PHELOPHEPHA TRAINS FROM TRANSNET STATIONED AT ULUNDI TOWN FOR HEALTH SERVICES

The community of Ulundi and Mahlabathini Municipality access Health Services on Othometrist, Dental, Phycologist and many more health services as the train got specialist. Operation Sukuma Sakhe, Local Task Team together with Zuluand Municipality and Ulundi Municipality supported the programme.
