1. CORROSION RESISTANCE

All of Sinkmaster commercial disposers are resistant to corrosion, utilizing the latest in materials technology and providing stainless steel components in the grind chamber-where it counts. <u>Sinkmaster lasts longer</u>.

2. HUSH CUSHION QUIETNESS

All Sinkmaster Disposers are fastened to the sink with a "hush cushion" suspension. This unique Sinkmaster feature minimizes noise transmitted from the operating disposer up through the sink into the work area, allowing the disposer to perform many decibels more quietly than competitive models.

3. DIRECTIONAL DOWNFEED

A Sinkmaster exclusive, the directional downfeed ridge assures complete drainage, eliminates odours, and actively provides a thorough interior cleansing of the entire disposer system.

4. SWIVEL IMPELLERS

Sinkmaster was the originator of swivel impellers and the first to patent this unique feature which provides for anti-jamming. Because the impellers swivel, there is no need for a reversing motor. They move out of the way of an impending jam and then fall back into position. Diamond hard carbide inserts provide longer life on heavy duty units.

5. DYNAMICALLY BALANCED STAINLESS STEEL TURNTABLE

The heart of all our disposers and the assurance of superb performance, our dynamically balanced stainless steel turntable insures evenness of cutting and long motor life.

6. TRIPLE LIP PROTECTED SEALS

Sinkmaster provides unsurpassed "state-of-the-art" triple lip seal protection reinforced by stainless steel springs to prevent any moisture from reaching the motor. In addition, all disposers are designed with a "slinger ring", to protect the seal from unwanted moisture and objects such as straws.

7. HEAVY DUTY CONTINUOUS-USE INDUCTION MOTORS

Sinkmaster uses only industrial quality, continuous use induction motors that are permanently lubricated and thermally protected for long life and economical use.

JOB FOURTEEN WAYS!

8. EASY REPLACEMENT FOR ALL MAKES AND MODELS

With a complete selection of easy-to-use adapters and sink mount kits, all of Sinkmaster high quality stainless steel disposers can easily replace any competitve disposer.

9. STANDARD OPENING

With a standard 152mm opening on models from 2 horse power through 5 horsepower, Sinkmaster makes installation very easy with standard cone or trough mounts available as accessories.

10. STAINLESS STEEL / CAST UPPER HOUSING

The upper housing on all Sinkmasters are either stainless steel or heavy duty cast steel, and provide the environment to perform with a minimum of noise transmitted back into the work area.

11. LONG-LASTING GRINDING COMPONENTS

Imbedded inside the swivel impellers are diamondhard, carbide cutters for long life-regardless of the type of food waste. The nickel-hardened, cast alloy grind ring allows efficient cutting action and is rated at an extremely high 60 Rockwell Hardness on the "C" scale.

12. RIPPER BLADES AND UNDERCUTTER BLADES

Ripper blades cut up large objects such as citrus rinds as they enter the grind chamber. Exclusive undercutter blades eliminate all stringy materials by cutting them into small pieces. This means even items such as corn on the cob and celery stalks will be thoroughly ground and completely disposed.

13. CORROSION RESISTANT DRAIN CHAMBERS

Utilizing the latest in materials technology, Sinkmaster drain chambers assure you the longest corrosion resistance in the industry, in either glass reinforced polyester or cast-steel-depending on the model.

14. THERMAL OVERLOAD PROTECTION

Sinkmaster thermal overload protector assures longer disposer life by minimizing any chance of motor burnout due to overheating.
