HOME BASED CARE TRAINING

Primary Health Care has identified the need of training the volunteers on home based care course, the training started on 31 January 2006 to 24 February 2006 where they were doing theory, on 7 to 18 August 2006 they were doing practicals.

The course was a big success in a way that student received their certificates on the last day of the workshop.

Primary Health Care would like to thank facilitators from Ndlelayempilo Consulting for providing a workshop.

The community at large will benefit a lot because those patients who need to be treated at home will get the service as soon as they need it.
