RABIES AWARENESS CAMPAIGN AND MMC CAMPAIGN ON THE MONTH OF SEPTEMBER 2011

Kuxwayiswe umphakathi ngesifo samaRabi!! Isifo samarabi sibikwa ukuba sesibuyile futhi siyabulala. U-matron Shabalala no sister Kubheka be-be phume ngezinkani beyoxwayisa abantu ngelesisifo. Kubikwa ukuba lesisifo usithola ngokulunywa yinja, noma ikati. Uma ulunywe ngesinye salezi zilwane geza ngamanzi ane-savlon uphindaphinde kawu-10, uphuthume emtholampilo ukuyokwelashwa. Izimpawu zamaRabi: ukulahlekelwa umqondo, ukwesaba amanzi, umphimbo obuhlungu kanye nezinye. Baxwayise ukuba ungazilindi izimpawu zamarabi, futhi ungasibophi isilonda lapho ulunywe khona yisilwane esinamaRabi.

Uhambe ngempumelelo umsebenzi wokusoka.
Ezinyangeni ezimbili okungu-August no-September ezedlule isibhedlela sikwazile ukusoka abantu abangamashumi amathathu (30). Lomsebenzi ubukeka uyinsilelo enkulu kodwa isibhedlela sethu siwenza ngempumelelo enkulu lomsebenzi, futhi sisazimisele ngokuqhubeka nawo. ngempumelelo

U- Sir. Masondo nozakwabo bedingida udaba lokwenza umsebenzi wokusoka ubeseqophelweni eliphezulu. Kwazise u-Masondo ungumuntu usebenza ngokuzimisela kuwo wonke umsebenzi awenzayo

Khanya Africa Awareness / Campaign

THE ABOVE TEAM WAS THE VOLUNTEERS OF HEALTH CARE SERVICES THAT WAS RENDERED AT MANYONI AREA.

The Government Department including DOH, DSD, and SASSA visited the community of Manyoni to deliver services. The community of Manyoni stay in a remote area. The place is between the Vryheid and Nongoma, they use Mkuze & Kwanjoko clinics for health services, which cost them an amount calculated to R40 and R80 to Hospital. The people are under the hindrance of having a high rate of population.

The community that was seen on the day was +/-160, for different services. Fifty-one people who were there were not having Identity Books and forty-five people were in a hindrance of the Birth Certificates, the community listed their names for assistance. MMC did not take place due to males being scared. Staff from various hospitals including Benedictine, New Castle, Escort, and Dundee hospitals all came to offer support to the community of Manyoni. And to Benedictine Hospital

Right handside: Mrs. R Sibiya. Left handside: Mrs. Bassie

Community of Manyoni Area

The Benedictine hospital Management would like to sincerely thank all staff members participated on the Khanya Africa campaign. We also like to share our feeling of gratitude to the community of Manyoni Area for assisting with community mobilization, collaboration and unity they shared with us. Last but not least we give thanks to the Manyoni Care Giver who did the wonderful work. Dr. Nxumalo for standing and showing spirit of teamwork we thank you all for your support.

CULTURAL DAY CELEBRATION!

Bekukuhle kudelile lapho izintokazi zikhangisa khona ngemvunulo, zikhombisa ukuziqhenya ngamasiko azo. Lolubekulusuku lamasikho, lapho ebesithi khona azibuyele emasisweni, siphinde sithi ziqhenye ngobuhlanga bakho. Lolusuku lugujwa yiSouth Africa yonkana lapho bonke abantu bekhumbula imvelaphi yabo. njengoba wazike nawe ukuthi i-South Africa iyi-Rainbow Nation. Bebephume ngobuningi abasebenzi besibhedlela beyibhikla ingoma bebungaza lolusuku.

24 September is earmarked as one of our South African public holidays and its significance rests in recognizing aspects of South African culture which are both tangible and difficult to pin down: creative expression, our historical inheritance, language, the food we eat as well as the land in which we live. Within a broader social and political context, the day's events... are a powerful agent for promulgating a South African identity, fostering reconciliation and promoting the notion that variety is a national asset as opposed to igniting c o n f l i c t .

NGIDEDELENI NGENZE INTO ENGIDUME NGAYO ISIKO LAMI LELI!!!!!!!!!!

ONE OF THE NURSES DRESSED IN INDIAN STYLE

Benedictine Hospital Pharmacy visited various school for HIV/AIDS Awareness

SIVANANDA HIGH SCHOOL

PRINCE NDABUKO HIGH SCHOOL

DENGE HIGH SCHOOL

 In the month August this year, the pharmacy department went out on a campaign to educate learners about the negative impacts of HIV/AIDS as they saw a growing number of young people coming to get ARV treatment at Empilweni clinic which is a HIV clinic at the hospital. So working together with the HIV unit they felt that they had to do awareness to schools. The hospital staff supported the idea and became part of the campaign. Mr. Pillay (Pharmacy Manager), and his team from pharmacy department, Ms. N Qongqo the PRO and Mr. Q Nkwanyana PRO Inserv. The learners were listened attentively to the speakers as there were questions being asked to the m and Mr. Mbatha narrated poems related to HIV and AIDS. The schools management welcomed us and they appreciated our visit

READERS MEET THE NEW PR STUDENT ON THE BLOCK , BATHATHE QOE!!!!!!

I am MR QOPHELO NKWANYANA P.R.O INSERV, I'M FEELING AUSPICIOUS AND JOYFUL TO BE TRAINED AT THIS INSTITUTION, I'VE BEEN GAINING MORE UNDER MY FIELD. MAY GOD BE WITH YOU ALL WHO SUPPORTED ME ON EVERY SNAGS. THANK YOU ALL GUYS.

T

uberculosis is one of the deadliest public health threats today, but there remains a lack of effective diagnostic tools.

This contributes to the global TB problem, as untreated TB patients remain a source of infection for other members of the community. Untreated TB also results in considerable morbidity and mortality, especially in HIV co-infected individuals.

Therefore it was very important for pathology laboratory to have this kind of modern technology instruments for Tuberculosis diagnosis.

Previously, NHLS main clients (DOH) relied on mycobacterium culture & drug susceptibility testing which took more than six weeks to identify Mycobacterium Tuberculosis complex. In contrast, the Gen-expert MDR/Rifampicin is a rapid test which identifies both the presence of MDR and Resistance of Rifampicin in a single test. Advantage of having this kind of test on site enable early and appropriate treatment initiation as well as accelerating the implementation of MDR-TB control measures, and ultimately reducing TB case incidence. **Why do we prefer GeneXpert in suspect cases?** The Gen-eXpert is more sensitive than smear microscopy. However the GeneXpert is only recommended for diagnosis of MDR and not follow up on TB treatment.

The main purpose of introducing Gen-eXpert in laboratories is to diagnose MDR in suspect cases, reduces workload and cost as it requires only one sample. But in our laboratory we are unable to do all suspects cases because of the size of the instrument. It only does four samples in two hours (in our working hours we only process 16 samples), but the presence of the machine has reduced waiting times for our patients waiting for their TB RESULTS

ISBHEDLELA IBENEDICTINE YAKWAZI UKUBA IPHUME NGEZINKANI NGALE LILANGA ELIKHULU LOMKOSI WOMHLANGA, KWAZISE PHELA NELANGA LALISHISA NGOKWED-LULELE. Welcome Some of Benedictine Batho-pele champions for 2011-2012

BATHO-PELE is a Sotho pronunciation meaning "Putting People First". Batho-Pele is vehicle to a better life for all South Africans by putting people first.

It is a programme for government officials aimed to improve the service delivery through the 11 principles of Batho-Pele

Duties of Batho-Pele Champions

- * To deepen the understanding of 11 principles of Batho-Pele as a service delivery policy**
- * To change the culture's/behaviors /attitudes of public servants**
- * To overcome resistance to change**
- * To motivate officials to go beyond the call of duty**

"Sithi umphakathi phambili singabasebenzi base Benedictine"

LET'S US MEET OUR NEWLY EMPLOYED STAFF !!!!

My name is Thokozani Nkambule, I joined Benedictine hospital from Department of public works on a cross-transfer basis. I've joined the institution to add value not numbers, all I can say I'm very happy.

MISS S. GUMEDE FROM PHYSIOTHERAPY DEPARTMENT, " I JUST LOVE IT HERE" SHE SAID WITH A VERY HUGE SMILE.

MISS T. DUBENI OUR FOOD SERVICE MANAGER, "BENEDICTINE IS SUCH A WARM PLACE. EVERYBODY YOU MEET IS WARM AND LOVING, ITS HOME AWAY FROM HOME"
