CONDOM DAY AT FORT NAPIER HOSPITAL

Infection and Prevention Control representatives with the leadership of Sr Fihla, Fort Napier Hospital (IPC Co-ordinator) held a Condom Day on 13 February 2014. The event took place at the 9C Forensic Hall at 10H00. During the event there was a very informative play which showed attendees how HIV/AIDS and other STI's can be transmitted from one person to another person. The play also made reference to how our communities turn to traditional medicine when they are infected by HIV/AIDS, due to myths that some traditional healers can cure HIV/AIDS. Attendees were shown on how to put on condom properly. At the end of the event IPC reps distributed reading material and condoms to all who attended. The IPC Co-ordinator would like to thank all staff members who attended, making the event a great success.

Below are pictures of the event:

A play illustrated how HIV/AIDS and other STI's are transmitted.

Informative charts on sexually transmitted diseases

A nurse counselling clients on sexually transmitted diseases.

Demonstration on how to put on a condom

Reading material was distributed to attendees

A play demonstrating the dangers of having multiple partners

A play demonstrated how traditional healers might mislead people.

A play demonstrating the dangers of having multiple partners

All attendees received condoms

Happy staff members with a box of condoms.
