Quality Day Celebration

King Dinuzulu Hospital Complex Celebrates Quality Day each and every year under different themes, This year we Celebrated Quality Day on the 16th of November 2023 under the theme “Realizing Your Competitive Potential” which refers to the setting of quality standards that allows an organization to perform better than its competitors.

We hosted an event for quality day with the purpose of raising quality awareness and provide support to staff members on the maintenance of high quality standards in the Departments.

The entire employees from various department attended the event, the crowd was fairly large and were incredibly gorgeous, as well as our venue was exquisitely decorated with orange colour of the day.

Mr S Khumalo opened the event with prayer. Dr Dlamini the CEO, said that A really wonderful morning We appreciate your presence and give a warm greeting to all new attendees of our Quality Day celebration, as well as to our eldest members who have been assiduously supporting us from the start.

I would like to express our heartfelt gratitude to each and every one of you on behalf of the EXCO members for your tireless efforts in raising the standard of service and assisting us in pulling off this successful event.

On this day we had five (5) Quality Improvement Projects Presentation from different departments.

1 : Pharmacy project Presentation

Poor monitoring and management of the safety of active medicinal products was the basis of their project. Strengthening the monitoring and management of the safety of active medicinal products for the treatment of drug resistant tuberculosis has been a project objective.

2) Ward M Project Presentation:

The emphasis of their project was record keeping. The project's goals were to prevent issues with improper documentation maintenance, as well as to encourage and support staff development in the unit by providing regular in-service training and ongoing staff supervision.

3) POPD Project Presentation:

The goal of their initiative was to stop the spread of the HIV virus among children. Supporting and preventing the rise in HIV viral load in Paeds was the project's main objective.

4) Accident and Emergency Project Presentation:

The rising number of abscondments was the main focus of their project. Lowering the department's abscondments rate was the project's main objective.

5) TB Surgical

5) The aim of the project was, in order to provide more training for medical staff on gaining informed consent as well as revising a spine authorisation form which complies with legal requirements and preparing patients for surgery.

All QIP Projects were successfully presented. Mrs S Ntuli, Ms TW Kubeka and Sr N Muniem presented Certificates and Awards with the purpose of encouraging quality management and to show appreciation to staff members who are dedicated to improving the quality of life around our Hospital.

2023 QIP Winners are:

- 1st Award won by TB Surgical Department
- 2nd Award won by Accident and Emergency Department
- 3rd Award won by POPD Department
- 4th Award won by Pharmacy Department
- 5th Award won by Nursery Department

Mr. K Cebekhulu and Mr. A Ayoob received special recognition from the CEO's office for going above and beyond to see that phone connections were restored after a considerable amount of time.

Mrs H Mchunu expressed her gratitude to all of the staff members, she thanked the event organisers and sponsors for arranging such a wonderful event. The event went off smoothly and everyone was quite excited.

PREMATURE COMMEMORATION DAY 2023

World Prematurity Day is observed annually at King Dinuzulu Hospital Complex. The theme for this year's celebration, which took place on the 21st November 2023, was "Small actions, Big impact: immediate skin-to-skin care for every baby, everywhere."

World Prematurity Day provides a chance to raise awareness of the significant burden of premature birth-related death, disability, and suffering. It also affords us an opportunity to discuss potential solutions. The focal point of the initiative is still the wide range of activities planned for World Prematurity Day across the globe.

Our goal in holding the prematurity day event was to raise awareness of premature delivery among patients, staff, and new mothers. In addition, strive to honor the lives of preterm newborns and increase awareness of the difficulties faced by mothers and their children as a result of preterm birth.

The staff members and expectant mothers who attended the event looked stunning, and our venue was beautifully decorated purple color of the day.

Mrs. Mkhwanazi offered a prayer to begin the program. Matron Msibi extended a warm welcome to everyone in attendance, and explained the day's agenda.

Our inspirational speaker, Ms..., a former boarder mom, inspired and urged women to love their children and to keep up KMC. Mr Hlongwa gave a quality talk where he was also encouraging mothers to take good care of their babies.

We also had a song and dance portion, everyone was singing, dancing, joyful, and enjoying themselves. Everyone was pretty excited, and the event went off without a hitch.

Gifts were given as expressions of appreciation by Sisters Mchunu and Adam to our speaker and all of the premature infant moms in attendance.

Sir J Govender conveyed his appreciation and thanked everyone who attended the event.

TRAUMA DAY 2023

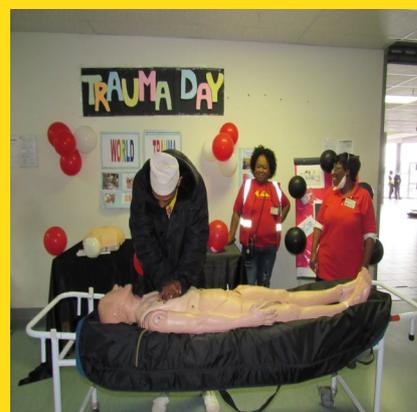

CPR Demonstration at the Foyer

Patients and visitors to the hospital received CPR training while waiting to be seen by the doctors

The purpose of the day is to raise public awareness of trauma, including its causes, symptoms, and prevention. Trauma is the emotional reaction to any event that has an impact on a person's physical and mental health, such as mishaps, injuries, sexual assault, natural catastrophes, or rape. Because it was Trauma Day commemoration, the King Dinuzulu Hospital Complex Trauma Unit chose to concentrate on providing CPR training to patients and visitors. The demonstration and in-service took place at the foyer, and patients were given the chance to showcase new skills they had learned that day. Why Is Cardiopulmonary Resuscitation Important? Life-saving CPR is possible. This approach is a first-line response that might potentially save a person's life in an emergency. Its goal is to maintain oxygen flow to essential organs, particularly the brain, until the heart can beat on its own again
