NEWSLETTER MANGUZI HOSPITAL

**MANGUZI HOSPITAL
DID IT AGAIN**

Not so long ago Manguzi Hospital won gold on Batho Pele implementation. On the 15th of May 2015 during the MEC's excellence award (MASEA), Manguzi hospital continued to rise above all odds, when:

- * Ms. Maryke Bezuidenhout the assistance director Physiotherapy won the special award on extra mile, dedication, loyalty and commitment to service delivery.

When talking to Maryke she said 'It is with huge surprise and great honor that therapy department at Manguzi Hospital receives the Masea award. When I say "Therapy Department" and not "Maryke Bezuidenhout", I mean just that, each member of our team, from our general assistant to myself as assistant director Physiotherapy have contributed to the design, implementation, monitoring and reviews of our rehabilitation services, without each member's individual insight, strengths and contributions, we would not be where we are today. I am truly humbled to work with such an exceptional team, who's unfailing passion, enthusiasm, motivations, creativity and drive enables us to provide a dynamic and responsive service. I would also like to thank our management for acknowledging, supporting and prioritizing rehabilitation, without their support we could not have achieved half of what we have achieved to date".

- * Mr. Duncan Mosele a Dietician, won a individual award for best frontline service delivery.

"On behalf of the Department of Dietetics and Human Nutrition, I would firstly like to extend my sincere gratitude to the Manguzi hospital management in setting the tone for the previous years to date by helping us run a successful department. Secondly, I express my heartfelt thanks to the Umkhanyakude health district team for being a large umbrella when no one of us expected the weather to be stormy, you lead by example and we appreciate your unfailing attention to detail. And lastly with all the support visits for monitoring and evaluation by the nutrition directorate in assuring the smooth running of our integrated programs". Says Duncan
