KZN Department of Health seeks solutions to Mpofana clinic issue

The Lease Contract for Mpofana Clinic expired in February 2015 and the department is reviewing its decision to use the facility. Without prejudice, the Department of Health has been communicating with the landlord regarding the continued use of the facility while looking for an alternative suitable accommodation.

The department is currently engaging with all concerned stakeholders to resolve the issue and would like to apologise to the community for any inconvenience caused by the disruption of health services.

Health care users are urged to visit the [Bruntonville Community Health Centre](#) while the issue of Mpofana Clinic is still being attended to.
