Fighting diseases, Fighting poverty, Giving hope

THE FLAGSHIP PROGRAMME HAS CHANGED THE LIVES OF THE DEEP RURAL AREA COMMUNITY UNER BIG FIVE FALSE BAY MUNICIPALITY

Mseleni Hospital has participated fully in propelling the programme of working together for a common goal among government

departments. The above family (Mbuyazi Family) has been found by the Mseleni Hospital Community Facilitators concealed in a dense bush along Lake Sibhayi. There are the family of 11 members with no identity documents, no social grants, no access, no school for children, no source of income or any access to government services

There were reported to flagship local committee for an urgent intervention. As a result, the family will be having an RDP house, removed from the bush towards the

main road next to clinics, schools and shopping and water will be installed for them.

Mseleni Hospital has also participated in Flagship through Male Circumcision Youth Bursary Schemes and School Health programmes.

These programmes has an innovation in reducing HIV/AIDS infections, school drop outs, teenage pregnancy as well as high illiterate youth.

WHAT IS OPERATION

MBO?

Once the survey has been done by Flagship committee. There will be lot of cases discovered related to deferent departments from that particular deprived municipal ward.

The committee will then interfere to those urgent case with the help by that relevant department. After that an Imbizo for all the departments with be organized in order to serve money and time for both departments and the community, and that is called “**OPERATION MBO**”

On the 4th-5th of November 2010 Operation MBO took place at Makhasa & Nibela tribals. Mseleni Hospital was also ther as a department of Health, doing HIV testing, peep smears, bursary forms for the youth, health promotion and encouraging Male circumcision.

Male circumcision continues

Mseleni hospital has successfully covered three Traditional Authorities doing Male Circumcision camps.

On our last camps done at Nibela Tribal under Inkosi Mdluli we did 127 males.

On the 9th–10 of December 2010 there was a circumcision at Mbila Traditional Authority under Inkosi Zikhali and on the 13-14 December 2010 was done at Mashabane Traditional Authority under Inkosi Gumede. Unfortunately our statistics didn't meet our expectations of 150 as we understood that there is a wide public awareness on MMC Programme. At Mbila we did only 27 and 22 at Mashabane.

But what is noticeable is that our community as Mseleni hospital is not yet well aware and understand the programme, that it serves as an instrument to reduce sexual related diseases.

So far the operation is going very well, no severe cases met and there is a provision at Mnqobokazi clinic for MMC as well as in the hospital through booking.

Therefore we still invite our beloved community to come and make arrangements with the PRO for camps and with the doctors for doing it in the hospital & clinic

Clients Survey results

P

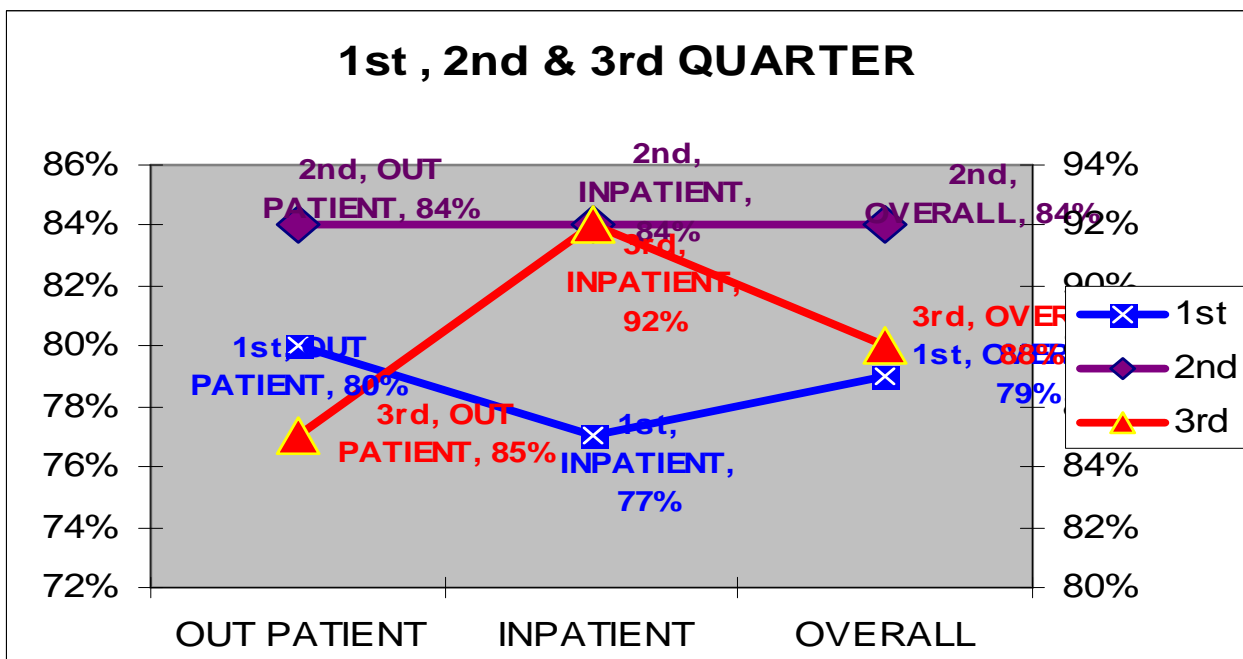

atient satisfaction survey was conducted within the hospital to see if the hospital is still functioning the way that would satisfy our clients.

Because we believe that an organization which is rated high is always measured by its clients.

However what we discovered is quiet good for the hospital, Most clients responded positively, and we have gained our momentum to rich such a percentage. We humbly ask our clinicians to continue giving health education to our clients as we are still lacking on it.

We would like to thank our nurses and everyone for ensuring a good service to our clients is done, keep up the good work till next quarter.

See the results below

Thunder disaster at Zenzeleni High

One of the victim learners showing burnt wounds on her back

Others were traumatized and having some bruises resulted from their pushing forcing the exit from their classes.

Fortunately no one died. Thanks to our nurses, doctors, social services and others who participated in that disaster.

We hope and believe that this wont have an impact in their final examination especially, Grade 12 learners because they are still using the same classrooms.

This has been a traumatizing disaster we have ever seen in the work place where Zenzeleni High school learners mounted to 100 have been admitted after a crashing thunder that left all the learners and educator traumatized. 'Two learners were seriously injured. one girl got burned on her back (see **first above picture**)

and the other boy was admitted due to his bad situation.

Traumatized learners

DISABILITY SPORTS EVENT

Occupational Therapy department has organized a pre-Christmas for the youth living with disability on the 21st October 2010 at Makhasa Sport complex.

At times people who live with disability are forgotten when it comes to recreation purposes. But, what has been noticed is that most government department has discovered some talents and skills from such people.

Therefore it has been a reason why OT Department organized such an event. Without any budget allocated for them , but they have managed to get financial support from business people and big 5 municipality.

during the day was the talents for singing, poetry, marathon, soccer, netball and even wheelchairs marathon. At the end of the event all participants who won were awarded by certificates

MSELENI HOSPITAL STAFF WELLNESS

Mr. Khulekani Dlamini (*HAST Coordinator*)

On the 11 of November 2010 Mseleni Hospital arranged a Staff Wellness where different stakeholders were invited to render services.

The purpose of the day was to make staff aware of the diseases in the work places and how they should keep themselves responsible.

Mr. Khulekani Dlamini (*HAST Coordinator*) from the District office was invited as a Guest Speaker to give an awareness on TB, HIV/AIDS & MMC. Mr. S. Mbonambi (*Mseleni Hospital HRD*) rendered a bursary service opportunities to the staff, Dr. Hobe (*Mseleni Hospital*) presented a Staff TB statistics. Other stake holders that were invited were Old mutual, SARS, as well as ABSA Bank. RICA

Mr. S. Mbonambi (*Mseleni Hospital HRD*)

NEW MBAZWANA CLINIC

Umphakathi waseMbazwana ngaphansi kweNkosi S. Zikhali nawo awusalanga ngaphandle ngesikhali kuvulwa ngokusempthethweni izakhiwo zoMphakathi wakulendawo ebezivulwa yiphalamende lakwa Zulu-Natal ebeliholwa ngu Dkt Zweli Mkhize mhla zingu 23 Novemehr 2010.

Umphakathi waseMbazwana uwushaye elikhulu ihlombe umnyango wezempilo ngokwakhelwa lot-holampilo omkhulukazi.

From right: MEC KZN Health Dr. S. Dhlomo, The premier Dr. Z. Mkhize & Clinic Operational Man-

Mbazwana Clinic started to operate in 1981 with only 1 consultation room, 1 labour room with 2 delivery beds, 1 treatment/ dressing room, 1 small pharmacy room, 1 reception area which was too small to accommodate clients coming for deferent services this was Mseleni health ward first residential clinic. Mbazwana clinic is at the perimeter of a developing Town called Mbazwana where there is a shopping complex, it is about 20km from the famous Bay called Sodwana which attracts a lot of tourists from all walks of life. Population served \pm 19,700 also considering migrating people from Mozambique and Swaziland. PHC head count has increased drastically in this clinic, taking also into account Department of Health initiatives rolled out to clinics e.g. ARV roll, TB management etc. Old structure became too small to accommodate the increasing number of clients in this clinic, they had to sit outside in spite of park home provided by the Department of health, all was in vain Mbazwana was established offered a 24 hrs on call service operating from Monday to Friday, on call over the weekends and public holidays. The clinic is visited by Clinicians i.e. Dieticians, Therapists, Dentist, Social Workers etc weekly. Doctors now visit the clinic 3 times due to workload Tuesday, Wednesday and Friday where they see patients with minor ailment, for chronic treatment and reviews, initiation of ARV'S. Initiation of ARV'S was rolled out to Mbazwana clinic in 2004 and they have made a noticeable progress in reacting the community more that 1400 patients receive their treatment from the clinic. The institution applied for clinic upgrading through District Office due to increasing PHC head count which has been completed in 2010

Population served is approximately 19,729 together with 10 mobile points around

Christmas message from the Public Relations Office

“Jabula ujule”

This means however joy you may find yourself into this festive period, ensure that you apply critical thinking, what so ever decision you will make, it will also count and determine your destiny.

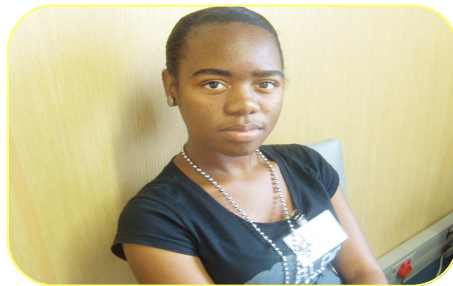

All in all I wish you a Merry Christmas and a happy new year.
May God keep you safe till we meet again next year 2011.

Thanks
Mr. TP Mdluli

I would like to take this opportunity to say good by but not for good. You have been so kind to me for the long 6 month period for my in-service training as a PRO. I really appreciate all the support you gave me thus far, I have acquired a lot of skills that I hope they will help me in my career.

Merry Christmas &

Ms. S.P. Nsele

Happy new year
