Mseleni joining forces with community structures

On the 4th May 2013, Mseleni Hospital participated in a Prayer Session that had been organized by Mashabane Youth Development Agency with Mashabane Tribal Council in the community of Manaba.

The area is faced with brutal killings, rapes and other violent social ills; therefore the prayer event was held to invite God's intervention. The Health Department represented by Mseleni Hospital had been identified as one of the most important stakeholders for the event as it receives rape and violent victims.

Dr V.G. Fredlund (Acting Hospital Manager and Medical Manager) urged the community to invite God in their lives and pray for their community; he further encouraged the community members to look after their health and visit their local clinics.
