

THE BIG 5 CANCERS AFFECTING MEN IN SA **COLORECTAL CANCER**

IT IS ESTIMATED THAT **1** IN **75** SA MEN WILL DEVELOP COLORECTAL CANCER

SIGNS & SYMPTOMS

(You can have early colorectal cancer without symptoms)

- Change in bowel habits
- Rectal bleeding
- Stomach pain
- Weakness
- Weight loss

TREATMENT AND PROGNOSIS

- Treatment depends on how far the cancer has advanced.
- Treatment may include surgery, radiation, chemotherapy, or a combination of these therapies.
- Prognosis also depends on how far the cancer has advanced. For early (stage I) cancer of the colon or rectum, the five-year survival is about 75 percent.

SCREENING

- Colorectal cancer can be found early with a screening test called a colonoscopy.
- Other screening tests are also available.
- For most men, screening should begin at age 50 and be repeated every 10 years depending on your risk.

REDUCE YOUR CANCER RISK:

Make sure to get cancer screenings

Exercise regularly

Eat a healthy diet

Maintain a healthy weight

Don not smoke

Avoid alcohol
