"Giving Hope, Fighting Poverty"

In August 2007 the 2nd year bridging course students at the Rietvlei Sub Campus embarked on their Community Based Education project. This is a requirement by the SANC as part of the learners curriculum to complete prior to completion of the course. It is meant to reach for those members of the Community who do not have access to health care. The students picked Mahlomane Administrative Area in UMzimkhulu which+- 5 km from the Hospital and the clinic. The main challenge that student came across , was Poverty, knowledge deficit in the community on how to access the government services. In their fight against poverty, the community had embarked on a major gardening projects which the students managed to get on opportunity to witness. The students were very impressed at how this big garden is managed in order to feed this poor community. All sorts of vegetables have been planted.
